Leading Industry Innovation Worldwide

Allmarc Industries is a global powerhouse that has undergone an incredible transformation, starting from a small 400 sq ft workshop in Ahmedabad, Gujarat, and growing into a massive 350,000 sq ft state-of-the-art manufacturing unit.

Our manufacturing facility is designed to support large-scale projects with efficiency and precision. Key features:

- **Massive Facility with Open Space:** 350k+ Sq. Ft. plant with ample space for large-scale and complex assemblies.
- **Multiple Large 60-Meter Bays:** Specialised areas for concurrent manufacturing with high-capacity cranes
- **100+ Advanced Machinery:** From robotic welding to CNC laser cutting, we have everything for precision fabrication
- **Focus on Sustainability:** Integrating sustainable practices into our operations to achieve carbon neutrality.

Manufacturing Partner for

Upstream Solutions

Exploration & Production

Onshore Solutions:

- Structural fabrication for platform rig frames, decking, topside modules, steel jackets, legs, and braces
- Elevated racks for pipelines with metal walkways
- Metal bases for wellhead and control equipment
- Custom skids and platforms for compressors, pumps, and generators
- Support structures for chimneys, exhaust towers, and gas flare stacks
- Scaffolding, decking & safety access solutions

Offshore Solutions:

- Structural fabrication for platform rig frames, steel jackets, braces, derricks and sub-structures
- Topsides modules and frames for equipment housing
- Helicopter landing pad frameworks
- Custom air intake metal ducts
- Custom platforms for safe equipment maintenance
- Scaffolding, decking & safety access solutions

Manufacturing Partner for

Midstream Solutions

Transport & Storage

- Support structure for long-distance pipeline
- Compressor station steel frames for housing
- Metal frames for mobile pump systems
- Metering station enclosures for protection
- Protective metal housings for flow and pressure equipment
- Large Storage Tank Structural Supports
- Catwalks Structures for safety access
- Heavy-duty steel structures and frames for oil and gas processing plants
- Loading/Unloading metal structure frameworks for truck, rail, and marine terminals
- Docking structures for oil and gas transport vessels
- Anti-skid decking / walkways / platforms & safety access solutions
- Scaffolding and shoring solutions for construction and maintenance
- Customised Fabrication

Manufacturing Partner for

Downstream Solutions

Refining & Distribution

- Storage tank supports for stability
- Refinery structures for processing units
- Piping supports and brackets for integrity
- Access platforms for maintenance and safety
- Pump skids for efficient fluid transfer
- Distillation column frameworks for support
- Heat exchanger frames for structural strength
- Loading and unloading racks for transport logistics
- Scaffolding and shoring solutions for construction and maintenance
- Safety access systems to ensure worker protection
- Customised Fabrication

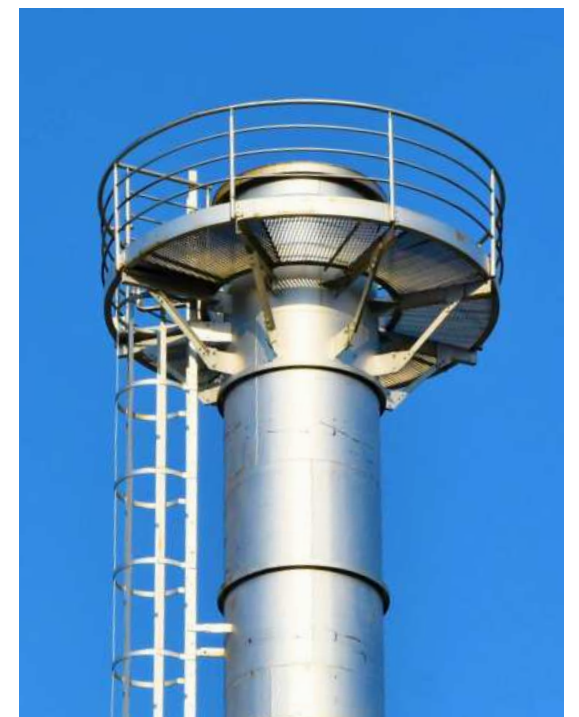

Manufacturing Partner for

HSE Solutions

Decking & Access System

- Decking & Safety Access Systems:
 - Staircases with proper rise-to-run ratios
 - Ladders with safety cages
 - Multi-level Elevated platforms with modular and reconfigurable designs
- Safety Features:
 - Anti-skid decking solutions like grip strut (serrated gratings, epoxy coatings)
 - High-visibility safety railings with kick plates
 - Structures for fall protection anchor points and horizontal lifeline systems
- Specialised Structures:
 - Chimney and flare system support structures for emergency gas disposal
 - Wind shields for high-elevation walkways
- Scaffolding and shoring solutions for construction and maintenance
- Customised Fabrication

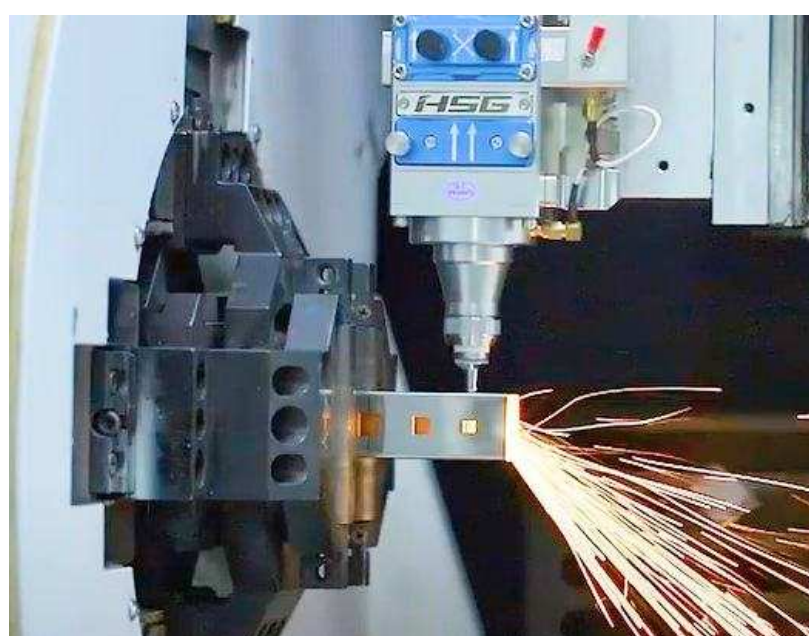

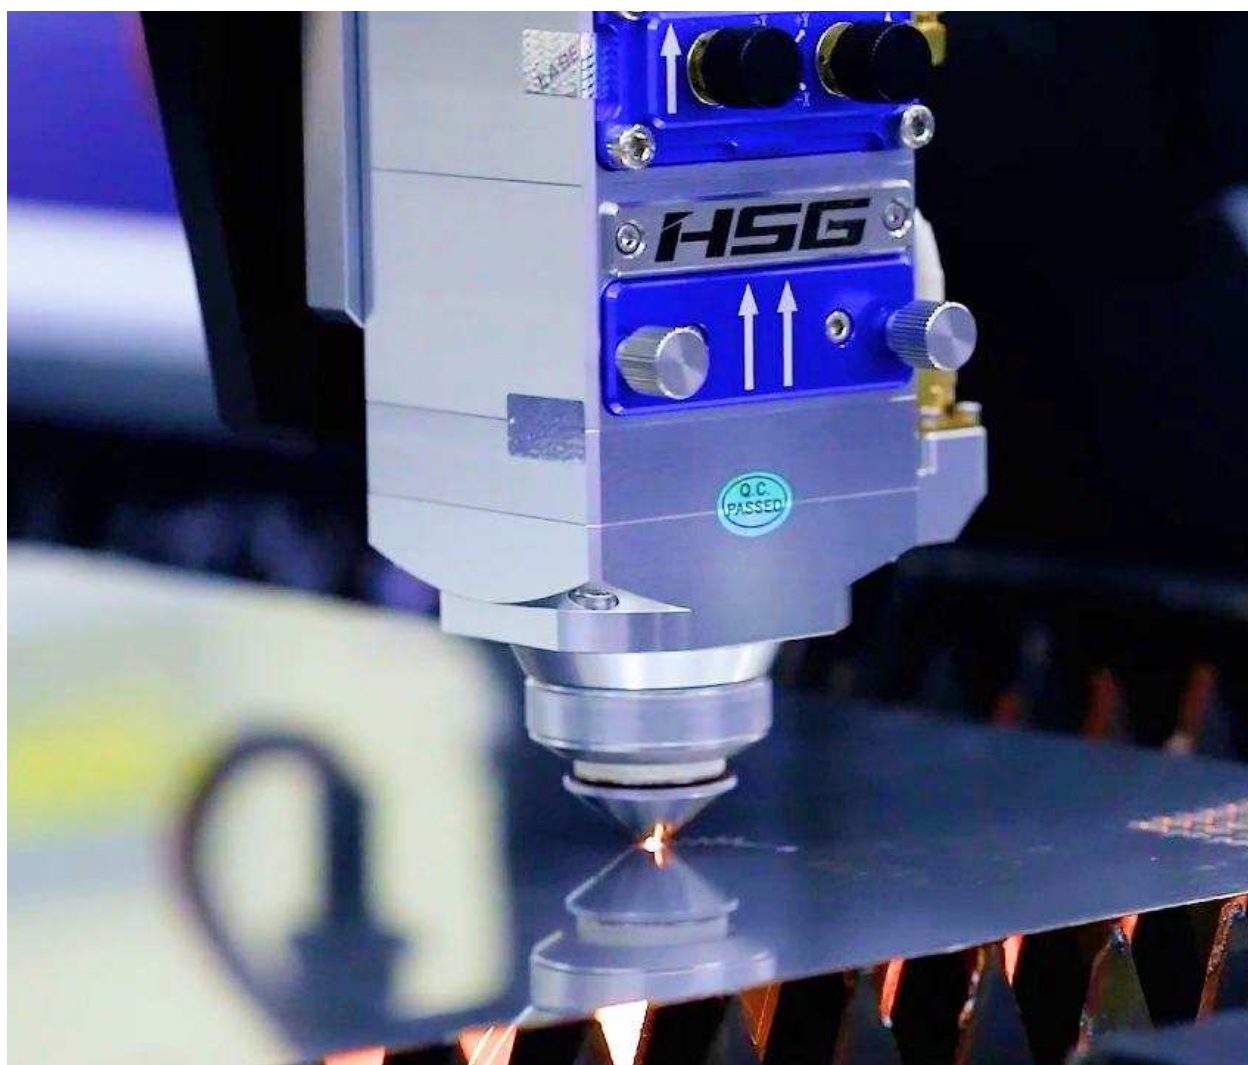

Advanced Machinery & Equipments

Allmarc boasts a comprehensive array of cutting-edge machinery across various categories to meet the demands of precision engineering and fabrication.

- CNC Machines for Precision Cutting and Punching
- Cutting Machines for Accurate Materials Shaping
- Bending Machines for Precision Bending
- Power Presses for Shaping Strength
- Drilling Machines for Precision Drilling
- Welding Machines for Expert Joining
- Pipe Cutting Machine for Tailored Pipe Cutting
- Robotic Welding for Efficiency through Automation
- Automated Welding for Streamlining Welding
- Press Brake Machine for Precision Bending
- Roll-forming Machine
- Beveling Machine
